To address the public health risks posed by wildlife markets, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JANUARY 4, 2021

Mr. QUIGLEY (for himself and Mr. UPTON) introduced the following bill; which was referred to the Committee on Foreign Affairs, and in addition to the Committees on Energy and Commerce, the Judiciary, Ways and Means, Financial Services, and Natural Resources, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To address the public health risks posed by wildlife markets,
and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Preventing Future
5 Pandemics Act of 2021”.

6 **SEC. 2. WILDLIFE MARKET DEFINED.**

7 In this Act, the term “wildlife market”—

8 (1) means a commercial market that—

1 (A) sells or slaughters terrestrial, including
2 avian, wildlife for human consumption as food
3 or medicine, whether the animals originated in
4 the wild or in a captive environment; and

5 (B) delivers a product in communities
6 where alternative nutritional or protein sources
7 are available; and

8 (2) does not include markets in areas where no
9 other practical alternative sources of protein or meat
10 exists, such as wildlife markets in rural areas on
11 which indigenous people rely to feed themselves and
12 their families.

13 **SEC. 3. STUDY ON RISK OF WILDLIFE MARKETS ON THE**
14 **EMERGENCE OF NOVEL VIRAL PATHOGENS.**

15 (a) IN GENERAL.—Not later than 30 days after the
16 date of the enactment of this Act, the Secretary of Health
17 and Human Services shall seek to enter into an agreement
18 with the National Academies of Sciences, Engineering,
19 and Medicine under which the National Academies of
20 Sciences, Engineering, and Medicine agrees to conduct a
21 study to evaluate—

22 (1) the impact of physical proximity and con-
23 sumption of terrestrial wildlife as food or medicine
24 on the emergence of viral and other microbial patho-
25 gens;

1 (2) the impact of consumption of terrestrial
2 wildlife as food or medicine on the transmission of
3 novel viral and other microbial pathogens;

4 (3) the role consumption of terrestrial wildlife
5 as food or medicine has on the transmission of mi-
6 crobes from animals to humans; and

7 (4) the conditions at live wildlife markets that
8 lead to transmission of zoonotic diseases.

9 (b) REPORT.—The agreement under subsection (a)
10 shall require the National Academies to, not later than
11 one year after the date of such agreement, submit a report
12 to the Committee on Health, Education, Labor, and Pen-
13 sions of the Senate and the Committee on Energy and
14 Commerce of the House of Representatives on the findings
15 of the study conducted pursuant to subsection (a).

16 **SEC. 4. INTERNATIONAL COOPERATION.**

17 (a) SENSE OF CONGRESS.—It is the sense of Con-
18 gress that global institutions, including the Food and Ag-
19 riculture Organization of the United Nations (FAO), the
20 World Organisation for Animal Health (OIE), and the
21 World Health Organization (WHO), together with leading
22 nongovernmental organizations, veterinary colleges, and
23 the United States Agency for International Development
24 (USAID), should promote the paradigm of One Health—
25 the integration of human health, animal health, agri-

1 culture, ecosystems, and the environment as an effective
2 and integrated way to address the complexity of emerging
3 disease threats.

4 (b) STATEMENT OF POLICY.—It is the policy of the
5 United States to facilitate international cooperation by
6 working with international partners and through intergov-
7 ernmental, international, and nongovernmental organiza-
8 tions such as the United Nations to—

9 (1) lead a resolution at the United Nations Se-
10 curity Council or General Assembly and World
11 Health Assembly outlining the danger to human and
12 animal health from emerging zoonotic infectious dis-
13 eases, with recommendations for implementing the
14 worldwide closure of wildlife markets and the ending
15 of the associated commercial trade of terrestrial
16 wildlife that feed and supply those markets, except
17 for in such countries or regions where the consump-
18 tion of wildlife is necessary for local food security or
19 where such actions would significantly disrupt a
20 readily available and irreplaceable food supply;

21 (2) work with governments through existing
22 treaties and the United Nations to develop a new
23 protocol or agreement, and amend existing protocols
24 or agreements, regarding stopping deforestation and
25 other ecosystem destruction, closing commercial

1 wildlife markets for human consumption, and end
2 the associated commercial trade of terrestrial wildlife
3 that feed and supply those markets while ensuring
4 full consideration to the needs and rights of indige-
5 nous peoples and local communities that are depend-
6 ent on wildlife for their food security, national sov-
7 ereignty, and local laws and customs;

8 (3) disrupt and ultimately end the commercial
9 international trade in terrestrial wildlife associated
10 with wildlife markets and eliminate commercial wild-
11 life markets;

12 (4) disrupt and ultimately eliminate wildlife
13 trafficking associated with the operation of wildlife
14 markets;

15 (5) raise awareness on the dangerous potential
16 of wildlife markets as a source of zoonotic diseases
17 such as the novel coronavirus that causes the disease
18 COVID–19 and reduce demand for the consumption
19 of wildlife through evidence-based behavior change
20 programs while ensuring that existing wildlife habi-
21 tat is not encroached upon or destroyed as part of
22 this process;

23 (6) encourage and support alternate forms of
24 food production, farming, and shifts to domestic
25 animal- or plant-source foods instead of terrestrial

1 wildlife where able and appropriate, and reduce con-
2 sumer demand for terrestrial wildlife through en-
3 hanced local and national food systems, especially in
4 areas where wildlife markets play a significant role
5 in meeting subsistence needs while ensuring that ex-
6 isting wildlife habitat is not encroached upon or de-
7 stroyed as part of this process; and

8 (7) strive to increase hygienic standards imple-
9 mented in markets around the globe, especially those
10 specializing in the sale of products intended for
11 human consumption.

12 (c) ACTIVITIES.—

13 (1) GLOBAL PROHIBITIONS AND ENFORCE-
14 MENT.—The United States Government, working
15 through the United Nations and its components, as
16 well as international organization such as Interpol
17 and the World Organisation for Animal Health, and
18 in furtherance of the policies described in subsection

19 (b), shall—

20 (A) collaboratively with other member
21 states, issue declarations, statements, and com-
22 muniqes urging a global ban on commercial
23 wildlife markets and trade for human consump-
24 tion; and

1 (B) urge increased enforcement of existing
2 laws to end wildlife trafficking.

3 (2) INTERNATIONAL COALITIONS.—The Sec-
4 retary of State shall seek to build international coali-
5 tions focused on ending commercial wildlife markets
6 for human consumption and associated wildlife trade
7 which feeds and supplies said markets, with a focus
8 on the following efforts:

9 (A) Providing assistance and advice to
10 other governments in the adoption of legislation
11 and regulations to close wildlife markets and
12 trade for human consumption.

13 (B) Creating economic pressure on wildlife
14 markets and their supply chains to prevent
15 their operation.

16 (C) Providing assistance and guidance to
17 other governments to prohibit the import, ex-
18 port, and domestic trade of live terrestrial wild-
19 life for the purpose of human consumption.

20 (D) Engaging and receiving guidance from
21 key stakeholders at the ministerial, local gov-
22 ernment, and civil society level in countries that
23 will be impacted by this Act and where wildlife
24 markets and associated wildlife trafficking is
25 the predominant source of meat or protein, in

1 order to mitigate the impact of any inter-
2 national efforts on local customs, conservation
3 methods, or cultural norms.

5 TIONS.—

6 (A) FINDING AND REPORT REQUIRED.—

16 (aa) continues to license or
17 enable commercial wildlife mar-
18 kets; or
