FISCAL NOTE ANALYSIS

STATE OF ALASKA
2024 LEGISLATIVE SESSION**Analysis**

This legislation establishes a system for integrated electric transmission system management and associated cost recovery process for the Regulatory Commission of Alaska (RCA). Under this legislation the RCA will establish a cost recovery mechanism, develop a process to transition collection of transmission costs, and create an integrated transmission system association.

The Alaska Energy Authority (AEA) does not anticipate impact from this legislation at this time. AEA owns transmission assets that are part of the Railbelt integrated transmission system, but is not regulated by the RCA according to AS 44.83.090(b). This legislation includes costs associated with the AEA-owned Bradley Lake hydroelectric project as part of the definition of transmission costs; however, as the Bradley Lake hydroelectric project is a part of the AEA no fiscal impact is anticipated.
