A BILL FOR AN ACT

101 **CONCERNING HVAC INFRASTRUCTURE IMPROVEMENT PROJECTS IN**
102 **SCHOOLS.**

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

The bill requires a school district, a charter school, an institute charter school, a board of cooperative services, or the Colorado school for the deaf and the blind (local education provider) to satisfy certain requirements concerning installation, inspection, and maintenance of heating, ventilation, and air conditioning (HVAC) systems in schools if the local education provider undertakes HVAC infrastructure

improvements using money made available by a federal government source or by a federal government source in combination with a state government source specifically for such purpose.

The requirements established in the bill concern:

- Ventilation verification assessments, which include assessments of an HVAC system's filtration, ventilation exhaust, economizers, demand control ventilation, air distribution and building pressurization, general maintenance requirements, operational controls, and carbon dioxide output;
- The preparation of HVAC assessment reports;
- The review of HVAC assessment reports by mechanical engineers, who make recommendations regarding necessary repairs and improvements, suggest pathways to reduce emissions, and estimate associated costs;
- HVAC adjustments, repairs, upgrades, and replacements;
- The preparation of HVAC verification reports and the submission of the reports to the state board of education; and
- Periodic inspections and ongoing maintenance.

The bill establishes mandatory criteria that an HVAC contractor must satisfy in order to perform work described in the bill. A local education provider that undertakes HVAC infrastructure improvements using money made available by a federal government source or by a federal government source in combination with a state government source must do so using only contractors on the certified contractor list established by the department of labor and employment.

The bill transfers money from the "Infrastructure Investment and Jobs Act" cash fund to the unused state-owned real property fund. The public-private collaboration unit in the department of personnel (unit) may use the money to provide grant writing support, administrative support, and project planning, to review the work of applicants, and to connect applicants with third parties with expertise pertaining to federal funding application technical assistance.

The bill requires the unit to facilitate a public-public partnership with local education providers to leverage federal dollars available to help public schools improve air quality in schools, student performance, and staff retention.

For each award of federal dollars obtained with the unit's grant writing support, the unit is authorized to retain 2.5% of the dollars awarded to cover the unit's administrative costs.

1 **SECTION 1. Legislative declaration.** (1) The general assembly
2 finds that:

3 (a) Students and staff in Colorado's public schools deserve access
4 to clean, healthy air along with proper heating and cooling to improve
5 their opportunities to learn;

6 (b) Indoor air quality is one of several toxic threats to students in
7 schools;

8 (c) The condition of inadequate school facilities can expose
9 students and staff to mold and legacy toxins such as lead, asbestos, and
10 industrial products and chemicals known as "PCBs"; poor air quality and
11 temperature control; inadequate lighting; and excessive noise; and

12 (d) Improving the air quality in schools can result in higher
13 attendance, better cognitive function, less asthma and other respiratory
14 health problems, and improved academic performance.

15 (2) The general assembly further finds that:

16 (a) In Colorado, many of the conditions that cause unhealthy
17 indoor air and environmental quality impact Colorado school buildings;

18 (b) Various Colorado schools have been featured in news stories
19 profiling funding shortages, heating and cooling issues, and the need for
20 facility improvements;

21 (c) The department of education's own "Facility Insight"
22 dashboard reports the average age of school infrastructure to be 40 years;
23 and

24 (d) State school buildings receive a poor score on the "Facility
25 Condition Index".

26 (3) The general assembly further finds that:

27 (a) Despite efforts by state agencies and school districts to

1 improve indoor environmental quality in classrooms and other school
2 buildings, many of Colorado's school districts lack the funding and staff
3 to improve facility conditions and thereby improve school health
4 outcomes;

5 (b) According to the American Society of Civil Engineers' 2020
6 infrastructure report card, Colorado schools have an approximately \$14
7 billion funding gap between the need for infrastructure replacements,
8 repairs, or upgrades and money available from regular funding and budget
9 processes;

10 (c) The current funding sources for schools do not equitably
11 distribute funding, leaving many schools in rural and disproportionately
12 impacted communities unable to pay for necessary retrofits and updates;

13 (d) The passage of the federal "Inflation Reduction Act of 2022"
14 and "Bipartisan Infrastructure Law", which was enacted as the federal
15 "Infrastructure Investment and Jobs Act", have made billions of dollars
16 in federal money available to combine with current and planned state or
17 local funding that can help public schools improve air quality, improve
18 student performance and staff retention, and realize significant energy
19 savings for school districts;

20 (e) Accessing this federal money would not only improve air
21 quality in schools but also bring billions of dollars in economic
22 investments in air quality projects to Colorado communities and workers;
23 and

24 (f) Unfortunately, many of the schools with the most pressing
25 infrastructure improvement needs lack the staff capacity to track, apply
26 for, and manage grant funding available at the state and federal level.

27 (4) Therefore, the general assembly declares that, in order to help

1 schools address health concerns and energy efficiency needs, this act:

2 (a) Will save schools money by ensuring that facility improvement
3 projects are completed by a highly skilled workforce and result in
4 measurable energy efficiency improvements and health improvements for
5 students and staff; and

6 (b) Allows Colorado's school districts to choose to undergo an
7 HVAC assessment and find a pathway to fund any improvements
8 identified without mandating that any school must undergo an assessment
9 or HVAC improvements.
