

115TH CONGRESS
1ST SESSION

H. RES. 403

Supporting the designation of March 2018 as Endometriosis Awareness
Month.

IN THE HOUSE OF REPRESENTATIVES

JUNE 22, 2017

Mr. DAVID SCOTT of Georgia submitted the following resolution; which was
referred to the Committee on Energy and Commerce

RESOLUTION

Supporting the designation of March 2018 as Endometriosis
Awareness Month.

Whereas endometriosis is a disease in which the type of tissue that normally grows in the uterus (the endometrium) also grows outside of the uterus;

Whereas endometriosis is one of the most common gynecological diseases in women, and occurs in 1 in 10 women of reproductive age;

Whereas endometriosis has no known cure;

Whereas the cause of endometriosis is not known, but risk factors include having a mother, sister, or daughter with endometriosis, periods that started at an early age, monthly cycles that are short, and menstrual cycles that are heavy and last more than seven days;

Whereas the only way currently available to be certain of an endometriosis diagnosis is to have a surgical procedure known as a laparoscopy;

Whereas endometriosis primarily affects women in their 30s and 40s, but can affect any woman who menstruates;

Whereas women experience a delay from three to eleven years between the first symptoms of pain and the final endometriosis diagnosis, which can lead to lower quality of life and high medical costs;

Whereas for many girls and women, endometriosis is a lifelong chronic disease that can affect relationships, school and work, fertility, and daily life;

Whereas the primary symptoms of endometriosis include pain and infertility, and many with endometriosis live with debilitating, chronic pain;

Whereas endometriosis is one of the three main causes of female infertility, and between 30 and 50 percent of women with endometriosis experience infertility;

Whereas health care providers must focus on managing the symptoms of endometriosis, which may include IVF, low-dose oral contraceptives, IUDs, pain killers (NSAIDs), and GnRH therapy; and

Whereas there is a need for further research and increased research funding for endometriosis, which could lead to earlier detection and the discovery of the cause of the disease, a reliable, less invasive way to diagnose the disease, more effective ways to manage symptoms, and a cure:
Now, therefore, be it

1 *Resolved*, That the House of Representatives—

1 (1) strongly supports the goals and ideas of
2 Endometriosis Awareness Month;

3 (2) recognizes the need for early detection and
4 treatment of endometriosis, increased education for
5 health care providers, and more culturally competent
6 care;

7 (3) remains committed to supporting and fund-
8 ing endometriosis research for more effective treat-
9 ments, increasing fertility, and, ultimately, a cure;
10 and

11 (4) encourages the people of the United States
12 to observe the month with appropriate awareness
13 and educational activities.
